Training Programs

The PowerOn Reliance Technical Training Program offers unique and comprehensive plans, developed specifically to support the learning needs of our customers.

Course offerings target three main areas:

- ❖ New Software Applications
- ❖ Changing Customer Needs
- ❖ Effective utilization of software applications in the production environment

The curriculum is developed using the **ADDIE** development model. Courses are designed to assist customers in expanding their knowledge of PowerOn Reliance Software applications and to optimize the practical use of the software, thereby gaining the best value for their business investment.

The course portfolio addresses the following areas:

- ❖ Operator & Dispatcher Training
- ❖ Database & Display Maintenance
- ❖ Software Subsystems & Application
- ❖ System Integration & Administration
- ❖ User Interface Administration & Configuration
- ❖ Program Development
- ❖ Advanced Power Systems Applications

- ❖ Software Configuration Management

Course Pricing

Standard Classroom Training is priced at **\$2,310** per student per week. Price includes training materials and breakfast.

Standard On-Site Training is priced at **\$13,640** per course week. Price includes training materials for up to 10 students. Instructor travel and living expenses are not included and are billed at cost plus 12% administration fee.
